Profile

Computer Systems Engineer specialized in Full Stack development, Enterprise Resource Planning (ERP) systems integration, and REST API design. Proven experience in creating scalable solutions utilizing ERP ecosystems. I excel in backend development with frameworks such as Django, Nest, FastAPI, and Java, complemented by solid frontend skills creating user interfaces with React, Vue, and Angular. Expert in relational databases (SQL Server, Oracle) and a faithful practitioner of SOLID principles and Clean Code to deliver technical value and efficiency at the corporate level.

Technical Skills

Languages:	TypeScript • JavaScript • Python • Java • C# • SQL
Backend:	Node.js • NestJS • Django • Django REST Framework • FastAPI • .NET Framework
Frontend:	React • Angular • Vue.js • Astro • Tailwind CSS • Bootstrap • HTML5 • CSS3
Databases:	SQL Server • Oracle • PostgreSQL • MySQL • SQLite
ERP:	PeopleSoft • Intelisis ERP
Cloud & BaaS:	Firebase • Supabase • Vercel
DevOps:	Docker • Git • GitHub • GitLab
Tools:	Visual Studio • VS Code • JetBrains • Cursor • Jupyter • Postman • Termius • Figma • Power BI
APIs & Formats:	REST • JSON • XML • Markdown
Productivity:	Microsoft 365 • Microsoft Teams • Trello • Discord
Operating Systems:	Windows • Linux

Certifications

- SOLID Principles and Clean Code | Udemy (Aug 2025)
ID: UC-4634536d-6d7f-402c-9c63-d7839589e9cd
- Modern JavaScript: Guide to Master the Language | Udemy (Aug 2025)
ID: UC-38b0820b-7d26-4cdf-a324-1f1be8638f40
- GIT + GitHub: Version Control System from Scratch | Udemy (Aug 2025)
ID: UC-a5e8b5f2-83b5-424e-8b72-d54fae40283d
- SQL Server: Advanced Programming | Udemy (Jun 2025)
ID: UC-07074dd0-6ed8-47a0-a21f-8c82fd857a7e
- Master in SQL Server: From Zero to Professional Level | Udemy (Jan 2025)
ID: UC-ecb70fc6-f8b8-4bb1-baa0-b4b715dd9c32

Experience

Cinépolis (Jan 2026 – present | Morelia, Mexico)

ERP Analyst (Jan 2026 – present)

- Global IT – Modules: Accounts Receivable (AR), Billing (BI), Strategic Rent (SR), and General Ledger (GL).
- Requirements gathering and technical-functional analysis of business processes to translate them into scalable solutions within the ERP.
- Development and customization in PeopleSoft using Application Designer, creating structural objects (Records, Pages, Components) and advanced logic with PeopleCode and Application Packages.
- Massive batch process automation with Application Engine and development/maintenance of structured programs and reports in SQR.
- Creation and integration of custom Java libraries (.jar) to extend native system capabilities.
- Configuration and administration of web services (REST / SOAP) for data exchange through Integration Broker.
- Construction of complex queries and optimization with Oracle SQL and Meta-SQL, generating corporate reporting in Query Manager and BI Publisher.

- Diagnostics and support for critical incidents in compliance with SLAs, execution of unit/integration tests, and participation in controlled migrations between environments.

Intelisis DMS Automotriz (Feb 2024 – Jan 2026 | Morelia, Mexico)

SQL / Backend Developer (Jul 2024 – Jan 2026)

- Requirements gathering, technical analysis, and preparation of comprehensive documentation for business integration platforms and applications.
- Design and development of RESTful APIs with Django and FastAPI for the management of appointments, clients, vehicles, and service order modules.
- Creation and maintenance of DLL libraries and Web Services in C# (.NET Framework) to extend functionalities and connect ecosystem components.
- Technical support, diagnostics, and continuous maintenance for the CRM platform developed in Angular.
- Implementation of security schemas with OAuth2 authentication and granular access control by corporate parameters and branches.
- Automation and real-time data synchronization between Intelisis ERP and external systems by consuming and exposing web services and multi-agency libraries.
- Advanced development and optimization in SQL Server: creation of Stored Procedures, functions, triggers, and CLR assemblies for high-performance database logic.
- Participation in controlled deployments, comprehensive testing, and assurance of operational continuity of solutions.

Development Intern (Feb 2024 – Jul 2024)

- Collaboration in the development and maintenance of queries, views, functions, and stored procedures in SQL Server for the Intelisis DMS.
- Support in the automation of recurring operational tasks and initial integration of internal system modules.
- Deployment, configuration, and update of web applications in local environments and WAMP Server servers.
- Execution of functional tests, script debugging, preparation of technical documentation, and application of agile work methodologies.

Instituto Tecnológico de Morelia (FAS) (Jan 2023 – Oct 2023 | Morelia, Mexico)

Jr Full Stack Developer (Jan 2023 – Oct 2023)

- Participation in full stack development for the creation, optimization, and maintenance of internal modules in the institution's platforms.
- Construction and maintenance of web services and backend utilizing Laravel and Django with integration to SQLite and MariaDB databases.
- Implementation of dynamic web interfaces with React, as well as responsive layout with PHP, HTML5, and CSS3.
- Design and consumption of REST APIs to connect backend logic with user interfaces.
- Relational modeling and database schema administration to ensure data integrity and query performance.
- Collaboration in User Interface and User Experience (UI/UX) design through prototyping and mockups in Figma.

Education

- Computer Systems Engineering | 2019 – 2024
Instituto Tecnológico de Morelia • Morelia, Michoacán
Specialty: Software Development Technologies.
- Intensive English Language Program (450 hrs) | 2021 – 2024
Foreign Language Coordination (ITM) • Morelia, Michoacán
Skills: Listening comprehension, speaking, technical writing, and reading.
- Diploma in General Accounting | 2015 – 2018
Colegio de Bachilleres del Estado de Michoacán • Michoacán, Mexico
Focus: Accounting principles, financial statements, and administration.
