PROFILE

Computer Systems Engineer specializing in Full Stack development, Enterprise Resource Planning (ERP) integration, and REST API design. Proven experience delivering scalable solutions within enterprise ERP ecosystems. Strong backend expertise using Django, NestJS, FastAPI, and Java, complemented by frontend development with React and Vue.js. Experienced in relational database management (SQL Server and Oracle) and committed to applying SOLID principles and Clean Code practices to build maintainable, high-quality software solutions.

EXPERIENCE

Cinépolis | Morelia, Mexico

ERP Analyst | January 2026 – Present

- Develop ERP solutions using PeopleCode, Application Designer, and Component Interfaces.
- Integrate Java (.jar) utilities into PeopleSoft to extend ERP functionality.
- Develop React.js interfaces connected to ERP APIs to optimize operational processes.
- Manage integrations through PeopleSoft Integration Broker and REST/SOAP web services.
- Automate business processes across AR, BI, SR, and GL modules through functional and technical analysis.
- Develop advanced Oracle SQL and Meta-SQL queries for reporting and operational audits.

Intelisis Automotive DMS | Morelia, Mexico

SQL & Backend Developer | July 2024 – January 2026

- Developed REST APIs using Django and FastAPI for appointments, customers, vehicles, and service orders.
- Implemented OAuth2 authentication and Role-Based Access Control (RBAC) to secure enterprise services and data.
- Developed SQL Server stored procedures, triggers, and .NET CLR assemblies.
- Integrated internal microservices for real-time data synchronization.
- Documented APIs and system architecture to standardize development practices across the team.

Software Engineering Intern | January 2024 – July 2024

- Optimized T-SQL queries in SQL Server for critical ERP processes.
- Participated in software deployments and automated testing within WAMP Server environments.
- Collaborated in cross-functional teams following Scrum methodology.

Academic Software Factory (TecNM Morelia) | Morelia, Mexico

Junior Full Stack Developer | January 2023 – October 2023

- Developed web applications using PHP, HTML5, and CSS.
- Built React.js applications integrated with Django and MariaDB.
- Converted Figma designs into responsive, performance-optimized web interfaces.

EDUCATION

Morelia Institute of Technology – National Technological Institute of Mexico (TecNM)

B.S. in Computer Systems Engineering | 2019 – 2024

- Specialization in Software Development Technologies
- Professional License: 14917873

Foreign Language Center (CLE) – Morelia Institute of Technology

English – B1 Level | 2021 – 2023

- Certified according to the Common European Framework of Reference for Languages (CEFR).

COBAEM – Michoacán State College of High School Studies

General High School Diploma | 2015 – 2018

- Mathematics & Physics and Humanities Concentrations
- Diploma in Accounting
