Profile

Computer Systems Engineer expert in backend architecture, enterprise ecosystem integration, and ERP optimization (PeopleSoft and Intelisis). Specialist in developing RESTful APIs with Django and FastAPI, as well as the interconnectivity of business-critical services. I possess advanced proficiency in relational databases (SQL Server, Oracle, PostgreSQL) and in extending functionalities through .jar (Java) and DLL (.NET) libraries. Currently, I lead technical solutions in PeopleSoft (PeopleCode, Integration Broker), transforming global requirements into robust and efficient architectures under clean code standards and Docker containers.

Stack

- Programming Languages**
- SQL: Advanced mastery in complex queries, stored procedures, triggers, and optimization in Oracle SQL (Meta-SQL), SQL Server, and PostgreSQL.
 - Python: Specialist in microservices development and critical process automation.
 - PeopleCode: Expert development of business logic and component customization in PeopleSoft.
 - Java: Creation of custom .jar libraries to extend native ERP system functionalities.
 - C#: Development of assemblies (DLL) to enhance database engine logic.
 - JavaScript: Construction of dynamic interfaces and service consumption.
- Frameworks and Libraries**
- Django / Django REST Framework: Architecture of robust APIs with OAuth2 authentication and enterprise service integration.
 - FastAPI: Design and deployment of high-performance APIs and lightweight microservices.
 - React.js: Development of modern user interfaces based on components and hooks for web applications.
 - PeopleTools: Advanced development with Application Designer, Application Engine, and Application Packages.
 - .NET Framework: Creation of components for logic extension in SQL Server environments.
 - Pandas / NumPy: Python-based data processing and analysis scripts.
- ERP Systems and Integrations**
- PeopleSoft Global: Technical management of Finance, HR, and Operations modules; component buffer administration (Rowset, Record, Field).
 - Integration Broker: Configuration and support of REST/SOAP web services for system interoperability.
 - Reporting Tools: Expert handling of BI Publisher, Query Manager, and data validation tools.
 - Intelisis DMS: Automation of interfaces and operational workflows for the automotive sector.
- Infrastructure and Tools**
- Databases: Advanced management in Oracle, SQL Server, PostgreSQL, MariaDB, and SQLite.
 - Docker: Containerization of applications to standardize development and production environments.
 - Git / Git Flow: Professional version control with strategic branch management.
 - Figma: Technical collaboration in UX/UI interface design and prototyping.
 - BaaS: Implementation of services with Supabase (Auth & Database).

Experience

Cinépolis
January 2026 – Present | Morelia, Michoacán

- ERP Analyst**
- ERP Software Engineering: Design, development, and optimization of robust solutions using PeopleCode, Application Designer, and advanced components such as Application Packages and Application Engine.
 - Extensibility and Advanced Logic: Integration of custom Java (.jar) libraries to enhance native PeopleSoft functionalities and resolve complex business requirements.
 - Integration Architecture: Management and support of REST/SOAP web services via Integration Broker, ensuring interoperability and data consistency across critical systems.
 - Data Analysis and Reporting: Advanced administration of queries and validations using Oracle SQL, Meta-SQL, and BI Publisher tools for strategic decision-making.
 - Technical-Functional Consulting: Translating business needs in Finance, HR, and Operations into scalable technological solutions, ensuring operational continuity and SLA compliance.

Intelisis DMS Automotriz
February 2024 – January 2026 | Morelia, Michoacán

- Back-End Developer (July 2024 – January 2026)**
- API Development: Architecture and deployment of RESTful APIs using Django and FastAPI for the comprehensive management of operational flows (clients, vehicles, and service orders).
 - Cybersecurity and Access: Implementation of OAuth2 authentication protocols and granular access control schemes to protect corporate information assets.
 - Database Engineering: Senior development in SQL Server, including the creation of stored procedures, triggers, functions, and assemblies optimized for high performance.
 - Process Automation: Real-time synchronization between the ERP and external interfaces, increasing operational efficiency in multi-agency and multi-business unit environments.
 - Software Development Life Cycle (SDLC): Leadership in unit testing phases, controlled deployments, and high-quality technical documentation to ensure system maintainability.

- Intern (February 2024 – July 2024)**
- Backend Optimization: Development and debugging of SQL scripts in SQL Server to improve performance in ERP data management.
 - Infrastructure and Deployment: Management of updates and production releases of applications in WAMP Server environments, guaranteeing operational stability.
 - Agile Culture: Active collaboration under Agile methodologies, participating in the integration of internal modules and technical-functional support for key users.

Academic Software Factory – IT Morelia
January 2023 – January 2024 | Morelia, Michoacán

- Jr. Full Stack Developer**
- Full Stack Development: End-to-end web application construction for institutional projects, using React.js for the frontend and Django for the backend.
 - UX/UI Design: Modeling responsive prototypes and design systems in Figma, focused on improving user experience.
 - Data Management: Design of relational database schemas in MariaDB and SQLite, ensuring referential integrity and efficiency in REST queries.

Education

Instituto Tecnológico de Morelia – Tecnológico Nacional de México (TECNM-ITM)
Computer Systems Engineering | 2019 – 2024
Specialization in Software Development Technologies Solid training in software development, databases, networks, object-oriented programming, and web technologies.

Foreign Language Center (CLE)
Instituto Tecnológico de Morelia English – B1 Level | 2021 – 2023
Certified according to the Common European Framework of Reference for Languages (CEFR).

COBAEM – Colegio de Bachilleres del Estado de Michoacán
General High School Diploma | 2015 – 2018
Physico-Mathematics and Humanities tracks. Diploma in Accounting.
